

SHAUNAK CHORGE

Mumbai/Pune, India | Ph: +91 9920644655 | shaunak.chorge@mail.com | Github | LinkedIn | Portfolio

EDUCATION

Dr. D. Y. Patil School of Science & Technology, DPU

Bachelor of Technology in Artificial Intelligence & Data Science

Cumulative CGPA: 9.62/10;

Relevant Coursework: Machine Learning, Software Engineering, Database Systems, Web Development, System Design;

Pune, India

Graduated: May 2026

PROFESSIONAL SUMMARY

Proficient and passionate software developer skilled in Python, Artificial Intelligence, and backend systems. Brings hands-on internship experience building scalable REST APIs, AI-powered chatbots, and automating complex workflows using modern frameworks and databases. Comfortable working across the full backend stack — from async task queues to LLM integrations — and continuously learning to deliver efficient, data-driven technical solutions.

WORK EXPERIENCE

OSOURCE GLOBAL PVT. LTD.

Python Automation Intern

Mumbai, India

Mar 2026 – June 2026

- Engineered RESTful backend APIs with Python, FastAPI, and PostgreSQL to sync data across internal company systems.
- Integrated Local LLMs into a document pipeline, automating structured enterprise report generation from unformatted input.
- Built a microservices-based identity-verification gateway to validate government IDs during user onboarding.
- Configured Celery and Redis for async task processing, decoupling background jobs from the main API to handle high load.
- Delivered production-ready code within Agile team, maintaining Git workflows and participating in sprint-based code reviews.

SHIVOHINI TECH-AI LLP.

Python Automation Intern

Remote, India

Sept 2025 – Mar 2026

- Built and deployed client-facing AI chatbots using LLaMA, OpenAI API, and RAG for accurate, domain-specific responses.
- Designed PostgreSQL and Supabase schemas to store chat history and user profiles, enabling stateful bot interactions.
- Structured conversation flows using intent-based state management, cutting bot failures during complex booking scenarios.
- Prototyped WhatsApp integration via Meta Cloud API and Twilio webhooks; gathered client requirements and tested endpoints.

UNIVERSITY PROJECTS

Speech Emotion Recognition System

Tech Stack: Python, Kaggle, Librosa, CNNs, LSTMs, Scikit-learn, Streamlit

Mar 2025

- Trained a CNN-LSTM model on the RAVDESS dataset to classify seven emotional states from raw audio with strong accuracy.
- Extracted MFCC, chroma, and mel-spectrogram features using Librosa as inputs to the classification pipeline.
- Deployed an interactive Streamlit app for real-time audio upload and emotion prediction.

Advanced CCTV Analytics System

Tech Stack: Python, Computer Vision, YOLO, OpenCV, MongoDB, Twilio, React

Nov 2023

- Built a real-time crowd monitoring system using YOLOv8 and OpenCV for individual detection and anomaly flagging on live CCTV feeds.
- Integrated Twilio SMS alerts with a MongoDB event log to notify security teams instantly on suspicious activity.
- Developed a React dashboard showing live camera feeds, detection counts, and incident logs.

ADDITIONAL

- Technical Skills:** Python, SQL, R, Java, Data Science, Artificial Intelligence, Machine Learning, Computer Vision, Data Analysis, Generative AI, NLP, RAG, REST API Development, Backend Development, Microservices
- Tools & Frameworks:** FastAPI, TensorFlow, Keras, PyTorch, Scikit-learn, OpenCV, LLaMA, Local LLMs, PostgreSQL, MongoDB, Redis, Celery, Docker, Git, Agile, BeautifulSoup, OpenAI, Supabase
- Languages:** English, Hindi, Marathi, German, French
- Certifications & Training:** Oracle Cloud Infrastructure 2025 Certified Gen AI Professional, Generative AI Certification – (Geeks for Geeks), Python for Data Science – (Infosys SpringBoard), Introduction to SQL & Python Django – (SimpliLearn)
- Awards:** 1st Runner-up – Code Golf (INNIXO - SWASTIK) 2025 | 1st Runner-up – Code Quest Infinity 2024 | Winners – SIH Internal Round Hackathon 2023
