EDUCATION

Dr. D. Y. Patil School of Science & Technology, DPU — Pune, India
Bachelor of Technology in Artificial Intelligence & Data Science — *Graduated: May 2026*
Relevant Coursework: Machine Learning, Software Engineering, Database Systems, Web Development, System Design — CGPA: 9.56/10

PROFESSIONAL SUMMARY

AI Engineer, Backend Developer, and Data Scientist with 14+ months of industry experience across FinTech, Banking & Audit, and Conversational AI domains. Hands-on building scalable REST APIs, LLM-powered chatbots, drafting/extraction pipelines, and workflow automation using Python, FastAPI, RAG, prompt engineering, and multi-database SQL. Comfortable across the full backend stack, from async task queues to LLM integrations, delivering efficient, data-driven solutions.

WORK EXPERIENCE

CLAPTEK PVT. LTD. — Mumbai, India
AI Engineer Intern — *Jul 2026 - Sep 2026*

- Designed and engineered a production LLM audit-finding microservice (FastAPI, Pydantic v2) with code-level zero-hallucination grounding and a multi-stage RAG pipeline, cutting latency ~28x (7.9 min to 16.9s) and live-client adoption.
- Built a grounded, domain-agnostic extraction pipeline for regulatory documents with verbatim-quote evidence-location, served via a Linux-hosted LLM over SSH and VPN tunnels, raising traceability accuracy from 56% to 97.2% on production records.
- Built an execution-accuracy harness for a natural-language-to-SQL assistant that replaces misleading proxy metrics with real database comparison, raising recall from 34% to 54% and precision from 19% to 27% through execution-guided self-correction.

OSOURCE GLOBAL PVT. LTD. — Mumbai, India
Python Automation Intern — *Mar 2026 - Jun 2026*

- Engineered backend features (Python, FastAPI, PostgreSQL, React) across financial reconciliation, SQL analysis, document verification, and AI document-generation platforms, staged via AWS S3 with LLM access through AWS Bedrock.
- Built WebSocket-based real-time monitoring for async data pipelines and refactored core matching algorithms for performance, while supporting multi-database integrations, Docker-based deployments, and Agile development.
- Enhanced LLM-powered document generation through prompt engineering, formatting fixes, and data-integrity improvements, reducing generation errors in production workflows.

SHIVOHINI TECH-AI LLP. — Remote, India
AI/ML Intern — *Sep 2025 - Mar 2026*

- Built and deployed client-facing AI chatbots using LLaMA, OpenAI API, and RAG for accurate, domain-specific responses.
- Designed PostgreSQL and Supabase schemas to store chat history and user profiles, enabling stateful bot interactions.
- Structured conversation flows using intent-based state management and prototyped WhatsApp integration via Meta Cloud API and Twilio webhooks, testing endpoints and cutting bot failures during complex bookings.

UNIVERSITY PROJECTS

Speech Emotion Recognition System — *Mar 2025*
Tech Stack: Python, Kaggle, Librosa, CNNs, LSTMs, Scikit-learn, Streamlit

- Trained a CNN-LSTM model across four datasets (CREMA-D, RAVDESS, TESS, SAVEE) to classify emotional states from raw audio, reaching 93.27% accuracy on a held-out cross-dataset test set.
- Extracted MFCC, chroma, and mel-spectrogram features using Librosa as inputs to the classification pipeline.
- Deployed an interactive Streamlit app for real-time audio upload and emotion prediction (<200ms CPU inference).

Advanced CCTV Analytics System - Smart India Hackathon 2023 (National Finalist) — *Nov 2023*
Tech Stack: Python, Django, Computer Vision, YOLOv8, OpenCV, MongoDB, Redis, Celery, Twilio, React

- Built a real-time crowd-monitoring system using OpenCV/YOLOv8 for detection and anomaly flagging on live CCTV feeds.
- Solved duplicate-alert flooding with a Redis sliding-window dedup (30s per camera + person track ID); integrated Twilio SMS alerts.
- Developed a React dashboard showing live camera feeds, detection counts, and incident logs. Presented to a government panel as a national finalist.

ADDITIONAL

- **Technical Skills:** Python, SQL, R, Java, Data Science, Artificial Intelligence, Machine Learning, Computer Vision, Data Analysis, Generative AI, Natural Language Processing (NLP), Retrieval-Augmented Generation (RAG), REST API Development, Backend Development, Full-Stack Development, Software Engineering, Data Structures & Algorithms, Unit Testing, Microservices, MLOps, Prompt Engineering, LLM Evaluation & Benchmarking, Hybrid Retrieval (BM25 / TF-IDF / Dense Embeddings), Model Grounding & Hallucination Control
- **Tools & Frameworks:** FastAPI, React, TensorFlow, Keras, PyTorch, Scikit-learn, Pandas, NumPy, Matplotlib, OpenCV, LLaMA, Local LLMs (Ollama, vLLM), Pydantic v2, PostgreSQL, Oracle, MS SQL Server, MongoDB, Redis, Celery, Docker, Linux, AWS Bedrock, AWS S3, Power BI, Git, Agile, BeautifulSoup, OpenAI, Anthropic Claude API, Supabase, JWT/RBAC
- **Languages:** English, Hindi, Marathi, German, French
- **Certifications & Training:** Oracle Cloud Infrastructure 2025 Certified Gen AI Professional, Generative AI Certification (GeeksforGeeks), Python for Data Science (Infosys SpringBoard), Introduction to SQL & Python Django (SimpliLearn), Young Professional Certificate (TCS iON)
- **Awards:** 1st Runner-up - Code Golf (INNIXO - SWASTIK) 2025 | 1st Runner-up - Code Quest Infinity 2024 | Winners - SIH Internal Round Hackathon 2023, National Finalist - SIH 2023
